DIFFERENT GRADES FOR  
SPECIFIC APPLICATIONS

*Family Owned and Operated  
Since 1941 with the  
Finest Hardwood Charcoal*

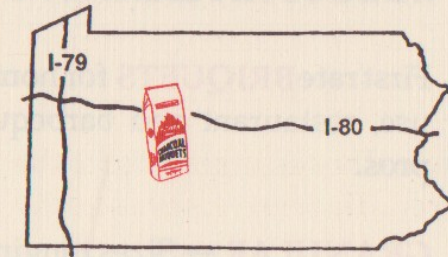

**HUMPHREY CHARCOAL CORPORATION** was originally formed in 1902 as a clay brick and tile manufacturer. The 18 kilns were converted over to make charcoal in 1941 due to the demand and the abundance of Pennsylvania hardwoods. Then, in 1947 Humphrey developed one of the first briquetting plants in existence and briquets quickly became the preferred charcoal choice. The process to make quality charcoal has essentially been the same since ancient times when fire was discovered. Time is the key factor to make the best available charcoal.
